Dear Debbie and Alan,

Thank you very much for installing a wireless thermostat in our house. The difference it has made to the temperature is unbelievable. We used to have to have the heating on full blast, around 30 degrees to keep the house at a comfortable temperature. Now even with the cold weather the other day we only put it up as high as 22 and found this to be too hot on some occasions. I can't believe the difference and I know that we will now save a considerable amount on our fuel costs.

Once again thank you for your friendly professional service

Louise and Mark Palmer-Broughton
