January 2007

Dear Theresa

I am writing to thank you for your continued support and guidance in improving and maintaining my general level of fitness and greatly improving my quality of life.

For many years I have suffered with the congenital condition of twisted hips. After numerous visits to many physiotherapists and chiropractors I had more or less given up trying to improve my condition.

My condition has been made worse over the last few years as my business is computer support which involves a great deal of time bend over a screen and keyboard.

I must congratulate you on your breadth of knowledge and level of skill in dealing with these problems. Not only did you listen and understand my condition but with a combination of massage and exercise you have given me a new lease of life. I am now able to exercise without pain and enjoy some active pursuits such as cycling and skiing.

Thank you also for your dietary help. The Nature's Sunshine products you recommend have been very effective and have significantly improved my energy levels.

I will continue to use your services and will recommend you to friends and colleagues.

Yours Truly

Ann Merrick
Director
